NEWS RELEASE

Telkonet/NuVisions Add Several Trump Properties to Growing List of Customers in New York

The Latest in a String of Residential Deployments Strengthens NuVisions Wi-Fi and IP Services Footprint in NYC

Germantown, MD – Telkonet, Inc. (Amex: TKO), the leader in providing in-building broadband access over existing electrical wiring, today announced that Microwave Satellite Technologies' (MST) NuVisions™ brand of services has added several marquis Trump properties to its growing list of residential customers in New York City.

The Trump Organization has selected NuVisions to provide a diverse range of communications services to residents in over 1,100 residential units in Trump Tower, Trump Palace, Trump Parc, and Trump Parc East. As part of the agreement, NuVisions will be providing these residents and building management with a comprehensive suite of leading-edge in-room amenities, including 100% digital satellite access with HDTV, Voice over Internet Protocol (VoIP), Internet access and Wi-Fi connectivity, giving residents a true choice between the current cable and telecommunications providers and NuVisions. The Trump Organization has given the residents of its properties the ability to “mix and match” and select the best offerings at the best prices between the service providers serving its properties.

With these NuVisions services, The Trump Organization will be enhancing their communications infrastructure by implementing a complete voice, video, data and wireless “quadruple-play” platform, giving them unprecedented control of all the IP services on their properties. The Trump Organization will be one of the first in New York to integrate all IP services across a common infrastructure, providing an unobstructed path for deploying new and innovative future services that are uniquely tailored to the residential property environment.

Mr. Donald J. Trump commented “NuVisions has helped us quickly meet demand for a bundled communications solution across a diverse range of our properties. The addition of digital satellite, VoIP, Internet and Wi-Fi services to our residential portfolio fits perfectly with the Trump brand and our commitment to providing our residents with the highest level of services and amenities to choose from.”

Frank Matarazzo, President of MST, added "This project with the Trump Organization is a significant event. It represents the first major deployment of true “quadruple-play” services across a diverse range of marquis properties and confirms that NuVisions is a perfect fit for the demanding needs of the residential real estate market in New York City. The commitment from the Trump Organization confirms that NuVisions is a key player in this space and we are pleased to be able to meet their

needs."

NuVisions suite of "quadruple-play" services includes the DISH Network Satellite TV package of over 500 channels with the largest ethnic offering and the largest High Definition offering available, high-speed Internet access delivered through the Telkonet iWire System™ that transforms every electrical outlet into a high-speed data port, reliable VoIP telephone service with superior quality over other providers who rely on the public Internet, as well as free Wi-Fi service in common areas of each property, public parks and large geographic areas throughout New York City.

NuVisions' use of the Telkonet iWire System in each of the Trump properties puts the infrastructure in place for effective energy management, smart building and green building applications providing the perfect solution to the increasingly important need to manage and control energy usage.

The NuVisions package also incorporates building security services and a customized, interactive resident gateway, enabling residents to have seamless communication with building and neighborhood services through their own computers or via a touch screen panel, including security, valet, and concierge which can also be used to control various functions, such as lighting, temperature, and other devices and systems.

About NuVisions

NuVisions™, a trademarked-brand of services of Microwave Satellite Technologies, Inc., a subsidiary of Telkonet Inc., offers "quadruple-play" services, including digital satellite TV programming, Voice over Internet Protocol telephone (VoIP), high-speed Internet access, and Wi-Fi services to multi-dwelling unit properties in New York and New Jersey.
