For Immediate Release**Telkonet Named in Top 25 in Deloitte's 2008 Nationwide Technology Fast 500 Program**

23rd place ranking underlines Telkonet's strong performance and growth

November 19, 2008: Germantown, MD – Telkonet, Inc. (AMEX:TKO), the leading provider of innovative, centrally managed solutions for integrated energy management, networking, building automation and proactive support services, has been named as one of the country's top 500 fastest growing organizations, achieving 23rd place in the Deloitte Technology Fast 500, an annual listing of the 500 fastest growing technology, media, telecommunications and life sciences companies in North America. Telkonet's ranking is based on the company's percentage revenue growth over five years (2003-2007), reflecting its consistent performance and technology leadership in energy management and broadband networking solutions.

President and CEO Jason Tienor highlighted Telkonet's remarkable progress, "Over the past five years, we have made a significant transition as a company. We have added an important business strand to augment our traditional roots as a powerline communications technology innovator, and are now firmly positioned as a leading provider of green energy management solutions. We are helping customers from a wide range of sectors – including hospitality, education and government – achieve tangible energy savings and meet their targets for green initiatives." Jason Tienor attributes this to Telkonet's unique combination of broadband networking expertise and advanced energy management systems, providing a high performance, fast deployment platform with a rapid payback cycle. He added, "Winning 23rd place in the Deloitte Fast 500 is an incredible achievement and it is an honor to be singled out for this award. We are building on this recent growth by expanding our penetration into new markets, while maintaining our focus on green and clean technology innovation."

Telkonet holds an acknowledged leadership position as a complete managed services provider, offering integrated solutions across energy management, high speed Internet access (HSIA), and powerline communications (PLC). Telkonet's unique solution set is based on a Software as a Service (SaaS) model, providing remote monitoring, management and customer reporting on top of an integrated technology platform.

About Deloitte

As used in this document, "Deloitte" means Deloitte LLP. Please see www.deloitte.com/about for a detailed description of the legal structure of Deloitte LLP and its subsidiaries.

About Telkonet

Telkonet is the leading provider of innovative, centrally managed solutions for integrated energy management, wired and wireless networking, building automation and proactive customer support services. The company's unique broadband networking solutions support more than 2 million network users per month, with its energy management systems dynamically lowering HVAC costs in over 95,000 rooms.

(more)

Telkonet's approach is designed to deliver complete system control and flexibility. Using the Software-as-a-Service (SaaS) model, Telkonet's products are all networked, enabling local and remote access via Telkonet's web-based platform, Telkonet CENTRAL. This essential management tool enables both property management and Telkonet customer support staff to monitor and manage all of Telkonet's systems proactively in real time, reducing costs and streamlining network support.

Telkonet's technology innovation is underpinned by the highest level of end-to-end quality of service, with comprehensive technical customer support. Telkonet's platforms are widely deployed on the global stage – in single buildings and ships, in multi-building complexes, hospitality venues, multi-dwelling units, and utilities.
